 **LexisNexis<sup>®</sup>**

Lexis<sup>®</sup> Legal Intelligence

Take the hard work out of keeping your firm's document base up-to-date

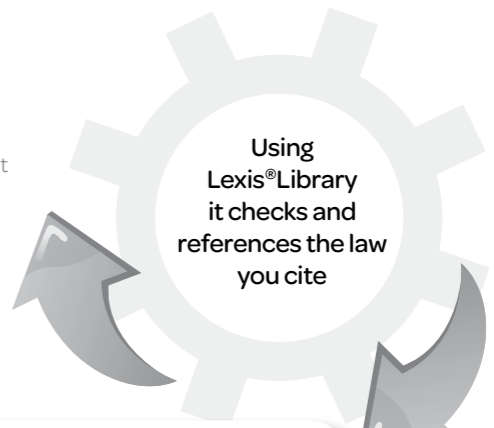

## Choose Lexis® Check Monitor, Lexis® Check Desktop or both to keep your firm ahead.

### Benefits of LexisCheck

- Efficiency**  
LexisCheck significantly reduces the time it takes to check documents for changes in the law and speeds up the process of checking citations within documents or on the web. It instantly provides the information you need to determine the correct application of the law.
- Risk Management**  
LexisCheck helps ensure that anything that is sent to your client or is created for internal use (KnowHow) is accurate, even if your fee-earners are using free sites.
- Competitive Advantage**  
Spotting errors in your competitors' documents or arguments puts you ahead with your clients.
- Accuracy**  
LexisCheck helps ensure that documents are accurate and helps prevent reliance on, or reuse of, out-of-date information.

**Client Development**  
LexisCheck monitors previous client advice for changes in the law. Automatic alerts prompt you to review that advice and give you the opportunity to re-engage with your clients.

"It will tell us exactly where those out of date citations are and in what documents, that takes about 90% of the time at the moment." PSL, Top 50 Law Firm

## How it works:

### Lexis® Check Monitor keeps your document bank up-to-date with changes in the law.

LexisCheck Monitor works with your document management system to analyse and monitor all your internal documents for changes in the law. It integrates seamlessly with either Interwoven or MSSharepoint®, immediately alerting you when your documents are affected by changes and showing you the impact of these changes. This allows you to act

quickly and efficiently to review client advice, client positions or update KnowHow, ensuring you're always one step ahead of the competition.

LexisCheck Monitor will actively monitor any documents that you choose. This means different lawyers and PSLs in your firm can monitor different sets of documents and receive individual alerts.

"It's like somebody else double-checking everything you do in terms of citations, which is great."  
Risk Manager, Top 50 Law Firm

"This is streets ahead of anything else on the market".  
Rosamond McDowell, Partner  
Collyer Bristow

### Lexis® Check Desktop ensures that legal references are accurate while your lawyers draft their documents and search the web.

While you **DRAFT** your documents, LexisCheck Desktop appears as a toolbar within Microsoft Word. Using the latest technology combined with LexisLibrary content, it automatically finds legal citations and shows you their current legal status through a simple "traffic light" system. It also provides a link to relevant LexisLibrary content, including primary law and related commentary.

While you search the **WEB**, LexisCheck Desktop identifies legal citations in the content (on intranets and the internet), links them to LexisLibrary content and shows you their legal status, so your fee-earners are less likely to get caught out by incorrect internet information.

**Lexis®Library** is the legal profession's most authoritative online research service, giving you a single point of access to thousands of trusted legal resources such as Halsbury's Laws, Harvey on Industrial Relations and Employment, Butterworths, Tolley's, as well as wide-ranging primary source materials including the All England Law Reports, The Civil Court practice and Atkins Court Forms.

“Just having the ability to hyperlink every statute in a document and be able to go straight to that statute is brilliant.” *Fee earner, Top 50 Law Firm*

## Technical Requirements

To share LexisCheck across your firm, we'll help you work with your IT team. You'll need to meet these minimum system requirements:

### For Lexis®Check Desktop:

- Microsoft Word 2002 or later
